Which of the techniques has increased additional work during development?

Which of the techniques has increased additional work during development?

03/26/2019	33171519	
03/25/2019	33089334	Code splitting
03/22/2019	32973908	Possibly code splitting, as mainly an Angular person it means I already from the start would have to think of the size on the project and if code splitting is needed. If not decided from start, it adds a big refactoring job to set it up correctly.
03/22/2019	32973950	
03/15/2019	32574358	Void
03/14/2019	32546588	It increased marginally.
